

Custom built mailbox.

Made from 6061 aluminum.

8.5" diameter .250" wall thickness

18.5" deep

19" overall height

Approximate weight 22 pounds

Made to bolt onto a standard 6"x6" wooden post. Approximately 5-5/8" between mounting plates. 1/2" mounting holes.

A simple non-locking hinged door that opens and closes on the front.

I can weld your name on to the side of the box if you want. Provided your name isn't "The Wolfeschlegelsteinhausenbergerdorff's" In my opinion the house number would look good on the front door of the box. This is a rugged mail box made to last many decades. You can paint it any color you like or let it oxidize naturally. \$300 and that includes your name and number welded onto the box.
